LinkedIn: [@beatriz1996](#)

## PERSONAL INTERESTS

UI/UX  
Digital Art  
Tattoos  
Playing Video Games

## PAST EXPERIENCE

### Mais Futuro, Curitiba — Front-end developer

AUGUST, 2020 - NOWADAYS

- Here I had the opportunity to learn Vue.js, keep learning to work with Node.js, and also start to work with Firebase solutions.

### Intergalaxy, Curitiba — Full-stack developer

MARCH, 2019 - JULY, 2020

- I have developed systems with PHP, mainly using Laravel and Bootstrap frameworks. I also had some experience with Node.js. In both cases, I worked as a front-end and back-end programmer. Furthermore, I worked with WordPress, OpenCart, Bling, and I'm familiar with some payment APIs, just like PagarMe and Compralo. Additionally, I worked with the libraries jQuery and React.js.

## PREVIOUS EDUCATION

### Opet, Curitiba — Analysis & Systems Development

MARCH, 2018 - JULY, 2019

- I studied programming languages like Java and Python, web development, and databases. I dropped out of the course in the third period because it was no longer necessary (Learning by myself proved to be more efficient).
